Work Experience

Jun 2022 - Oct 2022

Web Developer

at Cellcard, Cambodia

- Utilized Bitise (CI/CD tool) to build apps for quality assurance testing
- Maintained the application by fixing minor bugs as reported by quality assurance
- Developed a dynamic app bar component with background image fetched from CMS using Restful API for celebrating different events such as anniversary or festivals

Nov 2021 - May 2022

UX/UI Designer

at Cellcard, Cambodia

- Conducted research which influenced the decision to transition to new design tool which led to cost cut by approximately 80% while ensuring existing use cases are maintained
- Created design systems for two projects which resulted in reusability of components, better consistency and smoother handover to new designer
- Restructured design files to clearly indicate the design progress of each feature for business analyst, developers and product owners
- Designed both low and high fidelity wireframes and prototypes that fulfilled business requirements as set by product owners

Education
